- HCV** **TransElite HCV – Universal Life Insurance:** HCV policies have flexible premiums and can be funded with minimum premiums, but are typically used to build up cash surrender values. Cash value growth depends on the current interest crediting rate and cost of insurance charges. HCV policies have a minimum guaranteed interest rate and a maximum guaranteed cost of insurance. The premium is expected to provide coverage to age 100, plus a cash value equal to the face amount at age 100. The premium is expected to sustain the policy - however, skipped or reduced premium payments, changes in the non-guaranteed interest rate or charges, or acquiring a policy loan, a partial surrender or a face amount increase could require additional payments.
- TI** **Accelerated Death Benefit for Terminal Illness Rider (Form CRLTI1CT):** Lets the insured "tap into" life insurance in the event of a future terminal illness diagnosis and still provides a benefit for the beneficiary.
- LTC** **Accelerated Death Benefit for Long Term Care Rider (Form CRABLTCT):** Allows the owner to receive 4% of the rider face amount per month for up to 25 months if the insured is confined in a licensed nursing or assisted living facility, or 2% of the rider face amount per month for up to 50 months if the insured receives home health care or adult day care services. The benefit for this rider can only be triggered by a chronically ill diagnosis that must be certified by a licensed physician.
